eDirectory 13.6.00

Release Date: December 10th, 2024

What's New

1. Site owners can now clone custom pages using the Page Editor.

2. Site owners can now clone listing templates.

3. Clicks on chats supported by the Instant Messaging Plugin are now registered in listing stats reports.

4. Clicks on phone numbers are now registered in stats reports for listings, events, and classifieds.

5. Clicks on additional phone numbers are now registered in stats reports for listings.

6. Listings and events import now supports importing the main image, logo image, cover image, and gallery images.

7. Two new banner ad sizes added:

   a. Billboard (970 x 250)

   b. Half-page banner (300 x 600)

Minor Changes

1. Improved the subscription box on the Sponsors Dashboard and Subscription Details pages.

2. Enhanced the Plan Builder screen.

3. Moved the Page Promotional Codes feature to the Products & Plans section.

4. Screen to create promotional codes simplified to use a pop up.

5. Site owners can now view content protected by the members-only functionality.

6. Listing owners can now view content protected by the members-only functionality when they're visiting their own listings.

7. Campaign Monitor integration no longer uses Arca's reseller account.

8. Widgets on the Claim page now support customizable background colors.

Minor fixes

1. The User IP field in the Reviews table now supports IPv6 format.
2. Fixed an authentication error on the frontend when users change their usernames.
3. Fixed the Products & Services widget being displayed in the sidebar for listings that don't support it.
4. Resolved queries causing slowness on the admin dashboard.
5. Fixed an issue where listing activation emails were not sent to users.
6. Fixed an error on the listing sample page when the default template is removed from the system.
7. Fixed search parameters being lost after a site owner changes a listing's status.
8. Fixed an error occurring after updating a deal using the bulk update tool.
9. Fixed disabled modules being displayed in the frontend navigation.
10. Fixed an error when creating a redirect that includes special characters.
11. Removed a redundant welcome message from the Sponsors Dashboard.
12. Fixed gallery image limits being miscalculated after changing the listing product type in the listing form.
13. Resolved an issue with CKEditor not working correctly when the template editor includes a long description widget.
14. Fixed invoice renewals being set based on the invoice creation date instead of the payment date.
15. Fixed negative values being displayed on the checkout page when the discount exceeded the payment amount.

16. Fixed the checkout process failing when a 100% discount is applied.

17. Resolved an issue with the error message scroll position during the checkout process.

18. Fixed an error when adding two or more "Featured Categories (Type 2)" widgets to a page.

19. Fixed the Manage Leads page not displaying lead information.

20. Fixed plans with weekly renewal periods being displayed as monthly renewals on the checkout page.

21. Fixed the internal banner name being displayed across the system instead of the site owner-defined name.

22. Fixed a JavaScript error on the events and articles form when the Listing Association Plugin is enabled.

23. Fixed the claim process failing when the selected plan does not include a valid listing product for the claim.

24. Corrected the alignment of the Claim Steps widget.

25. Fixed past events appearing in search results for specific time zones.

26. Fixed incorrect tax values displayed in transaction notification emails.

27. Changed the label "Detail Page" to "View Example" for articles in the Pricing and Plans widget.

28. Fixed deal information not being sent to the API via the listing detail endpoint.

29. Fixed events for the following year not appearing in the Events Calendar widget.

30. Fixed an error when saving product information while the website is loaded behind a proxy.

31. Fixed an issue where the Products & Services widget limit was not being applied in the listing detail API endpoint.

32. Fixed issues in Products & Plans Management when managing a domain different from the one in the URL.

33. Fixed an issue where members-only content remained hidden from users even after disabling the members-only feature.

34. Fixed the responsiveness of the "Pick a subscription" pop-up during the claim process.

35. Fixed a database structure issue in item statistics that was preventing new entries in certain scenarios.

36. Fixed duplicate invoices being generated during the checkout process when users clicked the "Pay by Invoice" link multiple times.

37. Fixed the checkout process not working properly for free plans.

38. Fixed spacing issues in the categories list on the Grid View of the "Listing Summary Type Two" for listings with five or more categories.

39. Fixed an issue where user-defined order for Products & Services items was not being persisted.

40. Fixed an issue with payment exports failing when at least one subscription existed in the system.

41. Fixed inconsistencies in the Stripe subscription cancellation process where subscriptions canceled by the site owner were still displayed as active for sponsors.

42. Fixed an error that occurred when users tried to cancel a subscription that had already been canceled on Stripe.

43. Fixed the claim process not working with PayPal.

44. Fixed the checkout process failing when using 100% discount codes with PayPal.

45. Fixed invalid tax value rounding in certain scenarios.

46. Fixed an error in the Sponsors Section when editing an item associated with a subscription that was no longer available.

47. Fixed an error in the checkout process when the first payment of a subscription was free.

48. Added validation for accepted coupons, restricting their use to the first payment only when paying via Stripe.

49. Fixed an issue where the checkout process did not create subscriptions when paying by invoice with a 100% discount code.

50. Fixed slowness on the Advertise Page when the system stored a high number of listing templates.

51. Fixed the "Detail View" link not working in the "What's Included" pop-up during the checkout process.

52. Fixed the "What's Included" pop-up being unintentionally closed after dismissing the banner preview.

53. Fixed the guided tour displaying "Level" instead of "Product" in the Listing Form Staging.

54. Fixed responsiveness issues in the Photo Gallery.
